Subject: Environment Clearance for Expansion of Corporate Office Building Project at Plot C-11 & C-11 A located in City Centre, Sector-29 at Urban Estate-II, Gurugram, Haryana.

[1] This letter is in reference to your application dated 18.08.2020 addressed to Member Secretary, SEIAA, Haryana received on 27.08.2020 and subsequent letter dated 30.08.2020 seeking prior Environmental Clearance for the above project under the EIA Notification, 2006. The proposal has been appraised as per prescribed procedure in the light of provisions under the EIA Notification, 2006 on the basis of the mandatory documents enclosed with the application viz., Form-1, Form1-A, Conceptual Plan and additional clarifications furnished in response to the observations of the State Expert Appraisal Committee (SEAC) constituted by MoEF & CC, GoI vide their Notification dated 30.01.2019, in its meeting held on 30.08.2020 awarded "Gold" rating / grading to the project.

[2] It is inter-alia, noted that the project involves Expansion of Corporate Office Building Project at Plot C-11 & C-11 A located in City Centre, Sector-29 at Urban Estate-II, Gurugram, Haryana. The details of the project as given below:

| Sr. No. | Particulars | Existing | Expansion | Total Area (in M ²) |
|---------|----------------------------------|------------------------|-----------------|-----------------------------------|
| 1. | Online Project Proposal Number | SIA/HR/MIS/150547/2020 | | |
| 2. | Latitude | 28°28'10.87"N | 28°28'13.09"N | 28°28'10.87"N, 28°28'13.09"N |
| 3. | Longitude | 77° 3'40.47"E | 77° 3'40.20"E | 77° 3'40.47"E, 77° 3'40.20"E |
| 4. | Plot Area | 7820.80 Sqm | 6059.85 Sqm | 13,880.65 Sqm |
| 5. | Net Plot Area | 7820.80 Sqm | 6059.85 Sqm | 13,880.65 Sqm |
| 6. | Proposed Ground Coverage | 2650.60 Sqm | 2773.35 Sqm | 5423.95 Sqm |
| 7. | Proposed FAR | 14006.69 Sqm | 9534.38 Sqm | 23541.07 Sqm |
| 8. | Non FAR Area | 14327.73 Sqm | 12485.15 Sqm | 26812.88 Sqm |
| 9. | Total Built Up area | 28334.42 Sqm | 22019.53 Sqm | 50,353.95 Sqm |
| 10. | Total Population | 1731 | 1089 | 2820 |
| 11. | Total Green Area with Percentage | 1955.70 Sqm | 1515.30 Sqm | 3471 Sqm (25.01% of Plot Area) |
| 12. | Rain Water Harvesting Pits | 2 | 2 (double bore) | 4 |

| | | | | | |
|-----|-------------------------------------|--|---|--|---------------|
| 13. | Total Parking | 289 ECS | 207 ECS | 496 ECS | |
| 14. | Organic Waste Converter | 1 No. | | | |
| 15. | Maximum Height of the Building (m) | 39.3 meters | | | |
| 16. | Power Requirement | 916 KW | 1844 KW | 2760 KW (DHBVN) | |
| 17. | Power Backup(KVA) | 2 x 750+1 x 625 | 2 x 750+1 x 625 | 4 x 750+2 x 625 | |
| 18. | Total Water Requirement | 104 KLD | 116 KLD | 220 KLD | |
| 19. | Domestic Water Requirement | 23 KLD | 25 KLD | 48 KLD | |
| 20. | Fresh Water Requirement | 23 KLD | 25 KLD | 48 KLD | |
| 21. | Treated Water | 81 KLD | 91 KLD | 172 KLD | |
| 22. | Waste Water Generated | 69 KLD | 40 KLD | 109 KLD | |
| 23. | STP Capacity | 100 KLD | 50 KLD | 150 KLD | |
| 24. | Solid Waste Generated | 405 kg/day | 375.63 kg/day | 780.63 kg/day | |
| 25. | Biodegradable Waste | 471.51 Kg/day | | | |
| 26. | Number of Towers | 1 Building (C-11) | 1 Building (C-11 A) | 2 Buildings (C-11 and C-11A) | |
| 27. | Basement | 4 Basements | | | |
| 28. | Stories | G+ first floor (mezzanine)+ 5 floors in Building C-11 | G+ first floor (mezzanine)+ 5 floors in Building C-11 A | G+ first floor (mezzanine)+ 5 floors in Building C-11 and 11 A | |
| 29. | R+U) Value of Material used (Glass) | 3.97 W/m ² deg C for single glazed glass 2.67 W/m ² deg C for double glazing 6 mm space | | | |
| 30. | Total Cost of the project: | Land Cost | 207.322 | 245.815 | 453.137 Crore |
| | | Construction Cost | 185 | 260 | 445 Crore |
| 31. | CER | CSR is applicable on existing part. | Rs 2.529/- crores | CSR is applicable on existing part. For expansion, CER: Rs 2.529/- crores | |
| 32. | EMP Cost/Budget | Construction Phase: 41 Lakhs capital cost and 10.6 Lakhs Recurring cost. Operation Phase: 149 Lakhs capital cost and 18.5 Lakhs Recurring cost. | Construction Phase: 60 Lakhs capital cost and 12.75 Lakhs Recurring cost. Operation Phase: 75 Lakhs capital cost and 17.6 Lakhs Recurring cost | Construction Phase: 101 Lakhs capital cost and 23.35 Lakhs Recurring cost. Operation Phase: 156 Lakhs capital cost and 36.1 Lakhs Recurring cost. | |
| 33. | Incremental Load in respect of: | i) PM _{2.5} | 0.265 µg/m ³ | | |
| | | ii) PM ₁₀ | 0.265 µg/m ³ | | |
| | | iii) SO ₂ | 0.367 µg/m ³ | | |
| | | iv) NO ₂ | 1.70 µg/m ³ | | |
| | | v) CO | 1.19 µg/m ³ | | |

| | | | |
|-----|---------------------|--------------------------------|---|
| 34. | Construction Phase: | i) Power Back-up | 2 DG set of 125 KVA |
| | | ii) Water Requirement & Source | 2.5 KLD of fresh water will be procured from the local fresh water supplier. About 142 ML of treated water for construction purpose will be met from the authorized water supplier. |
| | | iii) STP (Modular) | 1 |
| | | iv) Anti-Smoke Gun | As per NGT order 01 Anti-Smog Gun will be provided at site |

CER ACTIVITIES

| S/No | Activities suggested by the communities during need assessment survey, for implementation | Total Estimated Expenditure in Lakhs (to be done in 7 years (Equally)) |
|-------------------------|--|--|
| 1 | Provision of Aqua-guard; Separate Toilets for Girls & Boys; Books & Computer for schools and whitewash the walls in four schools of Saini Khara Village; Chander Nagar; Sarhaul Village and Chandra Lok locality | 144.000/- |
| 2 | Pond adoption and conversion the same in RWH structure in first two years. A) SARHAUL POND (Area:- 5.50 acres) Distance - 1.9 Km; Direction-North Unique ID of Pond as per HPA: 02HRGGMGUR0005SHUL001 | 24.000/- |
| 3 | Drainage and road repair of village streets & construction of village common toilets in Saini Khara Village; Chander Nagar; Sarhaul Village and Chandra Lok locality. | 43.000/- |
| 4 | Fruit Tree Sapling plantation in Saini Khara Village; Chander Nagar; Sarhaul Village and Chandra Lok | 16.000/- |
| 5 | Tree Plantation on village common land 1400 tree will be planted in association with local panchayat | 20.899/- |
| Total CER Budget | | 252.899/- Lakhs |

ENVIRONMENT MANAGEMENT PLAN- EXPANSION PHASE

| COMPONENT | During Operation | | COMPONENT | During Construction Phase | |
|----------------------------|----------------------|-----------------------------|--|---------------------------|-----------------------------|
| | Phase | | | | |
| | Capital Cost (Lakhs) | Recurring Cost (Lakhs/year) | | Capital Cost (Lakhs) | Recurring Cost (Lakhs/year) |
| Sewage Treatment Plant | 30 | 1.5 | EMP cost of Construction phase (green net, tarpaulin cover to cover the construction material) | 8 | 0.5 |
| Rain water Harvesting Pits | 4 | 1 | Tractors/Tanker cost for Water sprinkling for dust suppression | 18 | 4 |

| | | | | | |
|---|----------------------|-------------|--|-----------|--------------|
| Acoustic enclosure/stack for DG sets and Energy savings | 8 | 2 | Wheel wash arrangement during construction phase | 4 | 1 |
| Solid Waste Management / OWC | OWC-25 lacs, Bins-01 | 2.2 | Sanitation for labors(mobile toilets) | 4 | 0.25 |
| Environmental Monitoring and six monthly compliances | | 5 | Environmental Monitoring and six monthly compliances | | 5 |
| Green Area/ Landscape Area | 7 | 0.9 | Anti-Smog Gun | 22 | |
| Environment Cell Scope: <ul style="list-style-type: none"> • To implement the environmental management plan • Operating and upgrading the existing Environment management facilities • To ensure regular compliance of NGT Orders, Circulars from MoEF&CC and EPCA. • To get the regular environmental monitoring done as per the norms of State Pollution Control Board. • Maintain environmental related records. • Review of EMPs and suggest modifications | | 5 | PPE for workers and medical facilities | 4 | 2 |
| Total | 5 | 17.6 | | 60 | 12.75 |

[3] The State Expert Appraisal Committee, Haryana after due consideration of the relevant documents submitted by the project proponent and additional clarification furnished in response to its observations, have recommended the grant of Environmental Clearance for the project mentioned above, subject to compliance with the stipulated conditions. The State Environment Impact Assessment Authority in its 125th meeting held on 07.10.2020 after due deliberations the Authority decided to agree with the recommendations of SEAC to accord necessary Environmental Clearance for the project under Category 8(a) of EIA Notification 2006 subject to the strict compliance with the with the following stipulations mentioned below:-

A. Specific Conditions:-

- 1) The PP shall ensure all the basements and floors shall be mechanically lit having proper Flux and properly ventilated through air circulation with 100 % back up.
- 2) The project proponent shall upload the status of compliance of the basic details (given in above tables), stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
- 3) Sewage shall be treated in the STP based on latest Technology with tertiary treatment i.e. Ultra Filtration. The Treated effluent from STP shall be recycled /reused for flushing, DG cooling and Gardening.
- 4) The PP shall install the solar photovoltaic cells of 85 KW for common areas.
- 5) The Project Proponent would devise a monitoring plan to the satisfaction of the State Pollution Control Board so as to continuously monitor the treated waste water being used for flushing in terms of faecal coli forms and other pathogenic bacteria.
- 6) The Project Proponents would commission a third party study on the implementation of conditions related to quality and quantity of recycle and reuse of treated water, efficiency of treatment systems, quality of treated water being supplied for flushing (specially the bacterial counts), comparative bacteriological studies from toilet seats using recycled treated waters and fresh waters for flushing, and quality of water being supplied through spray faucets attached to toilet seats.
- 7) Separate wet and dry bins must be provided in each unit and at ground level for facilitating segregation of waste. Solid Waste shall be segregated into wet garbage and inert materials. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste management within the premises which will include area for segregation, composting. The Inert waste from the project shall be sent to dumping site.
- 8) Traffic management plan as submitted shall be implemented in letter and spirit. Apart, a detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habilitation being carried out or purpose to be carried out by the project or other agencies in this 05kms radius of the site in different scenarios of space and time
- 9) No tree cutting has been proposed in the instant project. A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The Existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping. As proposed 3471 (25.01% of plot area) shall be provided for green area development.
- 10) The PP shall implement the EMP and assess that the implemented EMP is adequate and periodic environmental audits shall be conducted and maintained the records of audit. These audits shall be followed by Corrective action plan to correct the various measures identified during the audits.(CAP)
- 11) The PP shall install the Eco Friendly Green Transformer based on ester oil to reduce the carbon footprint. The PP shall shift to gas based generator set when the gas is available. The PP shall install APCM for the DG set.
- 12) The PP shall obtain the permission regarding withdrawal of ground water from CGWA before the start of the project and also obtained the CTO from HSPCB after the approval from CGWA.

- 13) 2 Rain water harvesting recharge pits shall be provided in addition to 2 already provided pits for ground water recharging as per the CGWB norms.
- 14) The PP shall install Digital water level recorder for monitoring the water recharge and carry out quarterly maintenance and cleaning of 4 RWH pits.
- 15) The PP shall take all preventive measures including water sprinkles to control dust during construction and operational phase.
- 16) The PP shall provide the Anti smog gun mounted on vehicle in the project for suppression of dust during construction & operational phase and shall use the treated water.
- 17) Any change in stipulations of EC will lead to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance.
- 18) The Clear glass with a bit of reflective properties is being used for the development of Project and same will be used for the Expansion part of the project. It has not observed any birds impact during construction and also it will not harm to any bird.
- 19) Extensive studies have been undertaken regarding Traffic flow & Level of Services around the site to ascertain that there would be no adverse effect or impediment in movement of traffic during Construction or Operational phase of upcoming project;
- 20) While carrying out the "Air Dispersion modeling" inbound and outbound vehicles 201 (PCU/hr.) along with the emission and 3 running hours of 3 DG sets has been considered;
- 21) Running of DG sets/ Captive Power during construction or operational phase and fuel to be used would be as per related Guidelines of GRAP & amp; strictures/injunctions passed by Hon'ble EPCA/NGT and further National Clean Air program vide Office Order No. HSPCB/SSC/2020/4320-44 dated. 25/06/2020 would be implemented.

B. Statutory Compliance:

- [1] The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority for ground coverage, FAR and should be in accordance with zoning plan approved by Competent Authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
- [2] The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc as per National Building Code including protection measures from lightning etc.
- [3] The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
- [4] The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
- [5] The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Haryana State Pollution Control Board.
- [6] The project proponent shall obtain the necessary permission for drawl of ground water /surface water required for the project from the competent authority.
- [7] A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
- [8] All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
- [9] The provisions of the Solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be followed.
- [10] The project proponent shall follow the ECBC Act/ECBC-Rules prescribed by Bureau of Energy Efficiency, Ministry of Power strictly in addition of bylaws of the State Government.

I. Air Quality Monitoring and Preservation

- i. Notification GSR 94 (E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition

- Activities for projects requiring Environmental Clearance shall be complied with.
- ii. A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
 - iii. The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM₁₀ and PM_{2.5}) covering upwind and downwind directions during the construction period.
 - iv. Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of ultra low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board
 - v. Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3 meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murrum and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.
 - vi. Sand, murrum, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
 - vii. Wet jet shall be provided for grinding and stone cutting.
 - viii. Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
 - ix. All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules 2016.
 - x. The diesel generator sets to be used during construction phase shall be ultra low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
 - xi. The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Ultra low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
 - xii. For indoor air quality the ventilation provisions as per National Building Code of India.

II. Water Quality Monitoring and Preservation

- i. The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
- ii. Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
- iii. Total fresh water use shall not exceed the proposed requirement as provided in the project details. The per capita supply should adhere to NBC 2016 and CGWA Notification dated 12.12.2018.
- iv. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC as well as to SEIAA, Haryana along with six monthly Monitoring reports.
- v. A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.

- vi. At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
- vii. Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
- viii. Use of water saving devices/ fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
- ix. Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
- x. Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
- xi. The local bye-law provisions on rain water harvesting should be followed. If local byelaw provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. The Rain Water Harvesting storage pit shall be provided for ground water recharging as per the CGWB norms.
- xii. A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
- xiii. All recharge should be limited to shallow aquifer.
- xiv. No ground water shall be used during construction phase of the project.
- xv. Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
- xvi. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
- xvii. Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
- xviii. No sewage or untreated effluent water would be discharged through storm water drains.
- xix. Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.
- xx. Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.
- xxi. Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.

III. Noise Monitoring and Prevention

- i. Ambient noise levels shall conform to residential area/commercial area both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.

- ii. Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report
- iii. Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.

IV. Energy Conservation Measures

- i. Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency as per ECBC Act, 2017 read with ECBC Rules, 2018 shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC also which is in no case should be less than 25% as prescribed.
- ii. Outdoor and common area lighting shall be LED.
- iii. Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof R & U-values shall be as per ECBC specifications.
- iv. Energy conservation measures like installation of CFLs/ LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
- v. Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.
- vi. Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
- vii. The PP will submit report indicating compliance of each parameter of ECBC requirement and submit quantification saving report for each component.

V. Waste Management

- i. A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.
- ii. Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
- iii. Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.
- iv. Organic Waste Converter within the premises with a minimum capacity of 0.5 kg /person/day must be installed. Leaves to be put in earmarked pits for converting them into compost to be used as manure.
- v. All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.
- vi. Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
- vii. Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.
- viii. Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.

- ix. Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Rules, 2016.
- x. Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.

VI. Green Cover

- i. No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).
- ii. A minimum of 1 tree (5' tall) for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
- iii. Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
- iv. Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.

VII. Transport

- i. A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria.
 - a) Hierarchy of roads with proper segregation of vehicular and pedestrian traffic.
 - b) Traffic calming measures.
 - c) Proper design of entry and exit points.
 - d) Parking norms as per local regulation.
- ii. Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
- iii. A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.

VIII. Human Health Issues

- i. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
- ii. For indoor air quality the ventilation provisions as per National Building Code of India.
- iii. Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.

- iv. Provision shall be made for the housing of construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.
- v. Occupational health surveillance of the workers shall be done on a regular basis.
- vi. A First Aid Room shall be provided in the project both during construction and operations of the project.

IX. Corporate Environment Responsibility

- i. The project proponent shall comply with the provisions contained in this Ministry's OM vide P.No 22-65/2017-IA.III dated 1st May 2018, as applicable, regarding Corporate Environment Responsibility.
- ii. The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/ deviation/ violation of the environmental/ forest/ wildlife norms/ conditions. The company shall have defined system of reporting infringements/ deviation/ violation of the environmental/ forest/ wildlife norms/ conditions and/ or shareholders/ stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
- iii. A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly to the head of the organization.
- iv. Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.
- v. PP must submit the Balance sheet/Account statement duly attested & signed by the Chartered Accountant showing the dispersal of funds in said schemes along with the "Six Monthly Compliance Report" positively.

X. Miscellaneous

- i. The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEF&CC/SEIAA website where it is displayed.
- ii. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
- iii. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
- iv. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal and soft copy of the same to the SEIAA, Haryana.
- v. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.
- vi. The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
- vii. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.

- viii. The project proponent shall abide by all the commitments and recommendations made in the form-IA, Conceptual Plan and also that during their presentation to the Expert Appraisal Committee.
- ix. No further expansion or modifications in the plan shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC)/SEIAA, Haryana. The project proponent shall seek fresh environmental clearance under EIA notification 2006 if at any stage there is change of area of this project.
- x. Any change in planning of the approved plan will leads to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance
- xi. The PP should give unambiguous affidavit giving land promoters in accordance with your ownership and possession of land legal the case referred for Environment Clearance to SEIAA.
- xii. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
- xiii. The Ministry/SEIAA may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
- xiv. The Ministry/SEIAA reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
- xv. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
- xvi. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
- xvii. The Project Proponent shall ensure the commitments made in Form-1, Form-1A, EIA/EMP and other documents submitted to the SEIAA for the protection of environment and proposed environmental safeguards are complied with in letter and spirit. In case of contradiction between two or more documents on any point, the most environmentally friendly commitment on the point shall be taken as commitment by project proponent.
- xviii. The Project proponent shall not violate any judicial orders/pronouncements issued by any Court/Tribunal.
- xix. Under the provisions of Environment (Protection) Act, 1986, legal action shall be initiated against the Project Proponent if it was found that construction of the project has been started before obtaining prior Environmental Clearance.
- xx. Any appeal against the this Environmental Clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.
- xxi. The project proponent shall put in place Corporate Environment Policy as mentioned in MoEF, Govt OM No. J-11013/41/2006-IA II (I) dated 26.4.2012 within 3 months period. Latest Corporate Environment Policy should be submitted to SEIAA within 3 months of issuance of this letter.
- xxii. The project proponent shall ensure the compliance of Forest Department, Haryana Notification no. S.O.121/PA2/1900/S.4/97 dated 28.11.1997.
- xxiii. The project proponent is responsible for compliance of all conditions in Environmental Clearance letter and project proponent can not absolve himself /herself of the responsibility by shifting it to any contractor engaged by project proponent. Besides the developer/applicant, the responsibility to ensure the compliance of Environmental Safeguards/ conditions imposed in the Environmental Clearance letter shall also lie on the licensee/licensees in whose name/names the license/CLU has been granted by the Town & Country Planning Department, Haryana.
- xxiv. The project proponent shall seek fresh Environmental clearance if at any stage there is change in the planning of the proposed project.

- xxv. In view of the severe constrains in water supply augmentation in the region and sustainability of water resources, the developer will submit the NOC from CGWA specifying water extraction quantities and assurance from HUDA/ utility provider indicating source of water supply and quantity of water with details of intended use of water - potable and non-potable. Assurance is required for both construction and operation stages separately. It shall be submitted to the SEIAA and RO, MOEF, Chandigarh before the start of construction.
- xxvi. Vertical fenestration shall not exceed 60% of total wall area.
- xxvii. The Project Proponent shall keep the plinth level of the building blocks sufficiently above the level of the approach road to the Project. Levels of the other areas in the Project shall also be kept suitably so as to avoid flooding.
- xxviii. The project proponent shall construct a sedimentation basin in the lower level of the project site to trap pollutant and other wastes during rains.
- xxix. The project proponent shall provide proper rasta of proper width and proper strength for the project before the start of construction.
- xxx. The project proponent shall provide fire control room and fire officer for building above 30 meter as per National Building Code.
- xxxi. The project proponent shall discharge excess of treated waste water/storm water in the public drainage system and shall seek permission of HUDA before the start of construction.
- xxxii. The project proponent shall maintain the distance between STP and water supply line.
- xxxiii. The project proponent shall ensure that the stack height is 6 meter more than the highest tower.
- xxxiv. For disinfection of the treated wastewater ultra-violet radiation or ozonization process should be used.
- xxxv. The project proponent shall strive to minimize water in irrigation of landscape by minimizing grass area, using native variety, xeriscaping and mulching, utilizing efficient irrigation system, scheduling irrigation only after checking evapo-transpiration data.
- xxxvi. The Project Proponent shall use zero ozone depleting potential material in insulation, refrigeration, air-conditioning and adhesive. Project Proponent shall also provide Halon free fire suppression system.
- xxxvii. Standards for discharge of environmental pollutants as enshrined in various schedules of rule 3 of Environment Protection Rule 1986 shall be strictly complied with.
- xxxviii. All electric supply exceeding 100 amp, 3 phase shall maintain the power factor between 0.98 lag to 1 at the point of connection.
- xxxix. The project proponent shall not use fresh water for HVAC and DG cooling. Air based HVAC system should be adopted and only treated water shall be used by project proponent for cooling, if it is at all needed. The Project Proponent shall also use evaporative cooling technology and double stage cooling system for HVAC in order to reduce water consumption. Further temperature, relative humidity during summer and winter seasons should be kept at optimal level. Variable speed drive, best Co-efficient

of Performance (COP), as well as optimal Integrated Point Load Value and minimum outside fresh air supply may be resorted for conservation of power and water. Coil type cooling DG Sets shall be used for saving cooling water consumption for water cooled DG Sets.

- xi. The project proponent shall ensure that the transformer is constructed with high quality grain oriented, low loss silicon steel and virgin electrolyte grade copper. The project proponent shall obtain manufacturer's certificate also for that.
- xii. The project proponent shall ensure that exit velocity from the stack should be sufficiently high. Stack shall be designed in such a way that there is no stack down-wash under any meteorological conditions.
- xiii. The validity of this environment clearance letter is valid up to 7 years from the date of issuance of EC letter. The environment clearance conditions applicable till life span project in case of Residential project will continue to apply. The resident welfare association/Housing co-operative societies shall responsible to comply conditions laid down in EC. In case of violation the action would be taken as per the laid down law of land. Compliance report should be sent to this office till life of the project.
- xliii. If project is not completed within the validity period then the project proponent shall submit the application for extension of validity within one month before the lapse of validity period of Environment Clearance i.e. 7 years.
- xliv. The project proponent should intimate to the Authority well before shifting their address of communication.

Chairman,

State Level Environment Impact
Assessment Authority, Haryana, Panchkula.

Endst. No. SEIAA(125)/HR/2020/

Dated: ____/10/2020

A copy of the above is forwarded to the following:

1. Additional Director (LA Division), MoEF & CC, Gol. Indra Paryavaran Bhavan, Zor bagh Road-New Delhi- 110003.
2. Regional office, Ministry of Environment, Forests & Climate Change, Govt. of India, Bay's No. 24-25, Sector 31-A, Dakshin Marg, Chandigarh-160030.
3. Chairman, Haryana State Pollution Control Board, C-11, Sector-6, Panchkula.
4. Director General, Town & Country Planning Haryana, Plot No. 3, Sector -18A, Madhya Marg, Chandigarh- 160018

-59-
Chairman,

State Level Environment Impact
Assessment Authority, Haryana, Panchkula.

| Project Name | Six Monthly Compliance Report for Corporate Office Building Project | June 2023 |
| Project Proponent | M/S Hyundai Motor India Limited | |
| Project Address | Plot No. C-11A, Located in City Centre, Sector 29, At Urban Estate-II, Gurugram, Haryana | |

POST ENVIRONMENTAL COMPLIANCE STATUS

Name of the project: Corporate office Building Project, at Plot no. C-11A, Located at City Centre, Sector 29, at Urban Estate- II, Gurugram, Haryana.

EC letter no.: SEIAA(125)/HR/2020/476 dated 28.10.2020

Status - Under Construction

Compliance conditions of the EC letter.

| A. Specific Conditions | | |
|------------------------|--|---|
| | EC Conditions | Compliance Status |
| 1. | The PP shall ensure all the basements and floors shall be mechanically lit having proper flux and properly ventilated through air circulation with 100% back up. | Noted. This will be complied in the later stage as currently the project is in early construction phase and the substructure is under construction. |
| 2. | The PP shall upload the status of compliance of the basic details (given in above tables), stipulated environmental conditions, including results of monitoring data on their website and update the same on half yearly basis | It is being uploaded on their website on half yearly basis. |
| 3. | Sewage shall be treated in the STP based on latest technology with tertiary treatment i.e Ultra Filtration. the treated effluent from STP shall be recycled /reused for flushing, dg cooling and gardening. | The construction work is under progress of STP Plant. The Treated Effluent from STP will be Recycled /Reused For Flushing as well as DG Cooling and Gardening after proper treatment. |
| 4. | The PP shall install the solar photovoltaic cells of 85 kw for common areas. | Agreed. |
| 5. | The project proponent would devise a monitoring plan to the satisfaction of the state pollution control board so as to continuously monitor the treated waste water being used for flushing in terms of faecal coli forms and other pathogenic bacteria. | Noted. Currently the project is in Initial phase of construction. This will be done in the operational phase. |
| 6. | The Project Proponents Would Commission A Third Party Study On The Implementation Of Conditions Related To Quality And Quantity Of Recycle and Reused Of Treated Water, Efficiency Of Treatment Systems, Quality Of Treated Water Being Supplied | Noted. Currently the project is in Initial phase of construction. This will be done in the operational phase. |

| | | |

| Project Name | Six Monthly Compliance Report for Corporate Office Building Project | June 2023 |
| Project Proponent | M/S Hyundai Motor India Limited | |
| Project Address | Plot No. C-11A, Located in City Centre, Sector 29, At Urban Estate-II, Gurugram, Haryana | |

| | | |
|----|---|---|
| | For Flushing (Specially The Bacterial Counts), Comparative Bacteriological Studies From Toilet Seats Using Recycled Treated Waters And Fresh Waters For Flushing, And Quality Of Water Being Supplied Through Spray Faucets Attached To Toilet Seats. | |
| 7. | Separate Wet And Dry Bins Must Be Provided In Each Unit and At Ground Level For Facilitating Segregation Or Waste. Solid Waste Shall Be Segregated Into Wet Garbage And Inert Materials. Wet Garbage Shall Be Composted In Organic Waste Converter. Adequate Area Shall Be Provided For Solid Waste Management Within The Premises Which Will Include: Area For Segregation, Composting. The Inert Waste From The Project Shall Be Sent To Dumping Site. | Agreed. Currently the project is in Initial phase of construction and colored bins are provided on site. Also waste segregation is being done on site. |
| 8. | Traffic Management Plan As Submitted Shall Be Implemented In Letter And Spirit. Apart, a Detailed Traffic Management And Traffic Decongestion Plan Shall Be Drawn Up To Ensure That The Current Level Of Service Of The Roads Within a 05 Kms Radius Of The Project is Maintained And, Improved upon after The Implementation Of The Project. This Plan Should Be based On Cumulative Impact Of All Development And Increased Habitation Being Carried Out Or Purpose To The Carried out by The project or Other Agencies in this 05kms Radius Of The Site In Different Scenarios Of space And time | Agreed. Traffic Impact Assessment study was done and the report was submitted with the EC Application. Moreover, no adverse impact will be caused in the nearby area, due to the project. |
| 9. | No Tree cutting has been proposed in the instant project. A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The Existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive | Agreed. No Tree cutting has been done at site. The Existing trees have been retained at site. |

| | | |
|-----|--|--|
| | species should not be used for landscaping. As proposed 3471 (25.01% of plot area) shall be provided for green area development. | |
| 10. | The PP shall Implement the EMP and assess that the Implemented EMP is adequate and periodic environmental audits shall be conducted and maintained the records of audit. These audits shall be followed by Corrective action plan to correct the various measures identified during the audits.(CAP) | Noted. The PP has Implemented the EMP and Conducting the periodic environmental audits as well as maintained the records of audit. |
| 11. | The PP shall install the Eco Friendly Green Transformer based on ester oil to reduce the Carbon footprint. The PP shall shift to gas based generator set when the gas is available. The PP shall install APCM for the DG set. | Noted. The condition pertains to the finalization stage. However, currently the project is in initial phase of construction. |
| 12. | The PP shall obtain the permission regarding withdrawal of ground water from CGWA before the start of the project and also obtain the CTO from HSPCB after the approval from CGWA. | No Ground water abstraction is proposed in the site. Prior permission will be obtained if need arises in future. |
| 13. | 2 Rain water harvesting recharge pits shall be provided in addition to 2 already provided pits for ground water recharging as per the CGWB norms. | 4 Rain water harvesting recharge pits have been constructed for ground water recharging as per the CGWB norms. |
| 14. | The PP shall install Digital water level recorder for monitoring the water recharge and carry out quarterly maintenance and cleaning of 4 RWH pits. | No Bore-well is proposed in the project. Thus as per guidelines of CGWA and HWRA, the said condition is not applicable on the project. Letter in this regard has already been submitted at SEIAA. Copy of acknowledgement is attached as Annexure XVII . PP will maintained the cleaning of RWH pits. |
| 15. | The PP shall take all preventive measures including water sprinkles to control dust during construction and operational phase. | Agreed. Anti-Smog Gun is deployed on site. Specification has already been submitted in previous compliance report. Annexure V . Logbook of Anti-Smog Gun has been attached as Annexure VI . |
| 16. | The PP shall provide the Anti-smog gun mounted on vehicle in the project for suppression of dust during construction | The Anti-smog gun has been provided at site, which is mounted on vehicle for suppression of dust during construction & it will be |

| | &operational phase and shall use the treated Water. | maintained in the operational phase as well and also using the treated Water. Photographs of Anti-Smog gun are attached in Annexure II . Logbook of Anti-Smog Gun has been attached as Annexure VI . |
| 17. | Any change in stipulations of EC will lead to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance. | Noted. |
| 18. | The Clear glass with a bit of reflective properties is being used for the development of Project and same will be used for the Expansion part of the project. It has not observed any birds impact during construction and also it will not harm to any bird | Agreed. |
| 19. | Extensive studies have been undertaken regarding Traffic flow & Level of Services around the site to ascertain that there would be no adverse effect or impediment in movement of traffic during Construction or Operational phase of upcoming project; | Agreed. |
| 20. | While carrying out the "Air Dispersion modeling' inbound and outbound vehicles 201 (PCU/hr) along with the emission and 3 running hours of 3 DG sets has been considered | Agreed. |
| 21. | Running of DG sets/ Captive Power during construction or operational phase and fuel to be used would be as per related Guidelines of GRAP & amp; structures/injunctions passed by Hon"ble EPCA/NGT and further National Clean Air program vide Office Order No. HSPCB/SSC/202014320- 44 dated. 25/06/2020) would be implemented. | Noted. |
| B. Statutory Compliance | | |
| 1. | The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority for ground coverage, FAR and should be in accordance with zoning plan | Noted. The building is being developed as per the approved plans. |

| | | |

| | approved by Competent Authority before commencement of work. All the construction shall be done in accordance with the local building byelaws. | |
| 2. | The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes. adequacy of firefighting equipment etc as per National Building Code including protection measures from lightning etc | Agreed. The said condition has been complied with. Structural Stability Certificate has already given in previous compliance report. attached as Annexure VIII. |
| 3. | The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986. in case of the diversion of forest land for non-forest purpose involved in the project | Agreed. Forest NOC has been obtained for the project and the same is attached herewith as Annexure IV. |
| 4. | The project proponent shall obtain clearance from the National Board for Wildlife, if applicable. | The project does not fall in any Wildlife protected area. Thus, the said condition is not applicable. |
| 5. | The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Haryana State Pollution Control Board. | Agreed. CTE has been obtained for the development of the project and the same is attached herewith as Annexure III. CTO will be obtained before commissioning/occupying the project. |
| 6. | The project proponent shall obtain the necessary permission for drawl of ground water /surface water required for the project from the competent authority. | No Ground water abstraction is proposed in the project. However, prior permission will be obtained if requirement arises in future. |
| 7. | A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained. | Noted. |
| 8. | All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities. | Permission from CCE is not applicable as diesel is procured on requirement basis only. |
| 9. | The provisions of the Solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be | As per said condition, it is being followed as same. |

| | | |

|---|---|--|
| | followed. | |
| 10. | The project proponent shall follow the ECBC Act/RAW-Rules prescribed by Bureau of Energy Efficiency, Ministry of Power strictly in addition of bylaws of the State Government. | Noted |
| I. Air Quality Monitoring and Preservation | | |
| i | Notification GSR 94 (E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with. | Agreed. Measures have been taken up on site to mitigate dust. Antismog gun & manual water sprinkling are provided at site. |
| ii | A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site. | Agreed. Quality of Ambient air is monitored in order to keep a check. Lab reports are attached as Annexure I . |
| iii | The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period. | Agreed. Quality of Ambient air is monitored in order to keep a check. Lab reports are attached as Annexure I . |
| iv | Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act. 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of ultra low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board | Noted. The condition refers to the DG Sets in operational phase. Currently the project is in construction phase. |
| v | Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall he provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the | Agreed. This has been done. Photographs can be referred in Annexure II . |

| | site (at least 3 meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murrum and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site | |
| vi | Sand, murrum, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution | Material is brought on site on requirement basis, which is stored in a designated room. Further loose material on site is stored with cover. |
| vii | Wet jet shall be provided for grinding and stone cutting | Noted. The said condition will be complied on applicable phase. |
| viii | Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust. | Agreed. This is being done through manual water sprinkling /Anti-smog gun. |
| ix | All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules 2016 | Agreed. |
| x | The diesel generator sets to be used during construction phase shall be ultra lowsulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards | Agreed. DG Sets are used only in case of power cut, which happens rarely. A copy of Bills is attached in Annexure -XVIII . |
| xi | The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Ultra low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms. | Agreed. |
| xii | For indoor air quality the ventilation provisions as per National Building Code of India. | Agreed. The building is being developed as per the sanctioned drawings. |
| II. Water Quality Monitoring & Prevention | | |

| | | |
|-----|--|--|
| i | The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water. | Agreed. No construction activity will be obstructing natural drains. No any Natural Drainage have been found near project site area. |
| ii | Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done | Agreed. Natural topography will not be affected. |
| iii | Total fresh water use shall not exceed the proposed requirement as provided in the project details. The per capita supply should adhere to NBC 2016 and CGWA Notification dated 12.12.2018. | Agreed. The project is under construction phase so fresh water requirements are used for drinking purposes. It is under the proposed requirements. |
| iv | The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC as well as to SEIAA, Haryana along with six monthly Monitoring reports | Noted. The said condition pertains to the Operational Phase. Currently the project is in early stage of construction. |
| v | A certificate shall be obtained from the local body supplying water specifying the total annual water availability with the local authority. The quantity water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users. | Noted. No ground water extraction is proposed for the project & also submitted with the EC proposal. |
| vi | At least 20% of the open spaces as required by the local building bye-laws shall be previous. Use of grass pavers. Paver blocks with at least 50% opening landscape etc. would be considered as pervious surface | Agreed. Landscape and pavements will be developed as per drawing submitted. |
| vii | Installation of dual pipe plumbing for supplying fresh water for drinking. Cooking | Noted. The said condition pertains to later stage of construction. Currently the sub |

| | and bathing etc and other for supply of recycled water for flushing. Landscape irrigation. Car washing, thermal cooling, conditioning etc. shall be done. | structure is under development. |
| viii | Use of water saving devices / fixtures (viz. low flow flushing systems, use of low flow faucets tap aerators for water conservation shall be incorporated in the building plan. | Noted. The said condition pertains to final stage of construction. Currently the project is in initial stage of construction. |
| ix | Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by gibing dual plumbing system are done. | Noted. |
| x | Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred. | Agreed. This condition is being complied with. |
| xi | The local bye-law provisions on rain water harvesting should be followed. If local byelaw provision is not available. Adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. The Rain water harvesting storage pits shall be provided for ground water recharging as per the CGWB norms. | Noted. |
| xii | A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5000 square of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In area where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority. | As per the EC Proposal submitted and EC letter granted to our project, 2 RWH pits (Double bore) have been constructed at the plot C-11A. |
| xiii | All recharge should be limited to shallow aquifer. | Noted. |
| xiv | No ground water shall be used during construction phase of the project. | Agreed. STP Treated Water is being procured form nearby vendor. Bills are attached as Annexure VII. |

|-------|--|---|
| xv | Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering. | Noted. |
| xvi | The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office. MoEF&CC along with six monthly Monitoring reports. | Noted. The said condition pertains to the Operational Phase. Currently the project is in early stage of construction. |
| xvii | Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled re-used for flushing. AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain. | Noted. |
| xviii | No sewage or untreated effluent water would be discharged through storm water drains. | Agreed. |
| xix | Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the sewage treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation treatment waste water shall be reused on site for landscape flushing. Cooling tower, and other end-user. Excess treated water shall be discharged as per statutory norms notified by ministry of Environment. Forest and climate change. Natural treatment systems shall be promoted. | Noted. The said condition pertains to finalization of development phase of the project. |
| xx | Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the about problem from STP. | Noted. The said condition pertains to the Operational phase. |
| xxi | Sludge from the onsite sewage treatment | Noted. |

|--|---|--|

III. Noise Monitoring and Prevention

| | | |
|-----|--|--|
| i | Ambient noise levels shall conform to residential area/commercial area both during day and night as per Noise Pollution (Control and Regulation) Rules, 2020. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase Adequate measures shall be made to reduce ambient air and noise level during construction phase. So as to conform to the stipulated standards by CPCB/SPCB | Agreed. Noise monitoring is being done regularly on site and the report is attached as Annexure I . |
| ii | Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report. | Agreed. Noise monitoring is being done regularly on site and the report is attached as Annexure I . |
| iii | Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources | Agreed. DG sets operational on site are having Acoustic Enclosures. Also PPEs have been provided to workers at the site. |

IV. Energy Conservation Measures

| | | |
|-----|---|---|
| i | Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency as per ECBC Act. 2017 read with ECBC Rules. 2018 shall be ensured. Buildings in the States which have notified their own ECBC. shall comply with the State ECBC also which is in no case should be less than 25% as prescribed. | Agreed. |
| ii | Outdoor and common area lighting shall be LED | Agreed. |
| iii | Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building | Agreed. Solar design has been considered for the project. |

| | | |
|--------------------------|---|----------------------|
| Project Name | Six Monthly Compliance Report for Corporate Office Building Project | June 2023 |

| | | |
|-----|--|---|
| | orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof R & U-values shall be as per ECBC specifications | |
| iv | Energy conservation measures like installation of CFLs/LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning | Agreed. The said condition is part of planning for the development of the project. |
| v | Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher | Noted. |
| vi | Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible | Agreed. Solar Panels and Meters will be installed in the final stage of construction phase. |
| vii | The PP will submit report indicating compliance of each parameter of ECBC requirement and submit quantification saving report for each component | Noted. The said condition pertains to the operational phase. |

V. Waste Management

| | | |
|----|---|--|
| i | A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained | Agreed. This will be ensured during the Operational phase. Currently solid waste & C&D waste are generated on site, which is being managed as per the respective rules. Bills are attached as Annexure IX . |
| ii | Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people. only in | C&D Waste is generated on site, which handed over to authorized vendors for management. Bills are attached as Annexure IX . |

| | | |

|------|---|--|
| | approved sites with the approval of competent authority. | |
| iii | Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials. | Agreed. The said condition is being complied on site. Waste segregation is being done on site. |
| iv | Organic Waste Converter within the premises with a minimum capacity of 0.5 kg /person/day must be installed. Leaves to be put in earmarked pits for converting them into compost to be used as manure. | Noted. |
| v | All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers. | Noted. The said condition will be complied in the Operational Phase. |
| vi | Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board. | Noted. Waste lube oil from DG Sets is the only Hazardous Waste generated on site. However, DG Sets are used only in case of power cuts, which is very less. We ensure that the Waste lube oil from DG Sets will be handled as per rules. |
| vii | Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, fly Ash Lime Gypsum blocks, compressed earth blocks, and other environment friendly materials. | Agreed. RMC is being used having Fly ash content and Admixtures to reduce water consumption. |
| viii | Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 17th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction. | Noted. |
| ix | Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Rules, 2016. | C&D Waste is generated on site, which is being managed as per the respective rules. Bills are attached as Annexure IX . |
| x | Used CFLs and TFLs should be properly collected and disposed off/sent for recycling | Noted. |

| | as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination. | |
| VI. Green Cover | | |
| i | No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted). | Agreed. No tree felling has been done within site premises. |
| ii | A minimum of 1 tree (5" tall) for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping. | Noted. List of trees proposed to be planted on site have been submitted with the EC Application. |
| iii | Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document. | Cutting of trees has not been done on site. |
| iv | Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site. | Agreed. Top soil will be reused in landscaping. |
| VII. Transport | | |
| i | i. A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), | The said condition is a corporate office building and Underground Parking is |

| | | |
|----------------------------------|--|---|
| | shall be prepared to include motorized, non-motorized. public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria. a) Hierarchy of roads with proper segregation of vehicular and pedestrian traffic. b) Traffic calming measures. c) Proper design of entry and exit points. d) Parking norms as per local regulation. | provided. Other than this, the area is well connected with road networks which will not be affected by the development of the project. |
| ii | Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours. | Agreed. The vehicles used for transportation of construction material are PUC Certified. PUC Certificates are attached as Annexure X . |
| iii | A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments. | Agreed. The Traffic study was carried out and the report of the same was submitted with the EC Proposal. |
| VIII. Human Health Issues | | |
| i | All workers working at the construction site and involved in loading, unloading. Carriage of construction material and construction debris or working in any area with dust | Agreed. PPE Kits have been provided to labours including safety boots, gloves, safety belts, masks etc. |

| | | |
|--------------------------|---|----------------------|
| Project Name | Six Monthly Compliance Report for Corporate Office Building Project | June 2023 |

| | | |
|---|--|--|
| | pollution shall be provided with dust mask. | |
| ii | For indoor air quality the ventilation provisions as per National Building Code of India. | Agreed. |
| iii | Emergency preparedness plan based on the hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented. | Noted. Risk Assessment and Disaster Management Plan was drafted and presented during the SEAC meeting. |
| iv | Provision shall be made for the housing construction labour within the site with all necessary infrastructure and facilities such as fuel for cooking. Mobile toilets. Mobile SEP, safe drinking water. Medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project. | Labour has been employed from nearby areas. Amenities including, mobile toilets (with regular cleaning), potable water, resting area etc have been provided. Drinking water bills are attached as Annexure XV . Toilet Cleaning Bills are attached as Annexure XVI . |
| v | Occupational health surveillance of the workers shall be done on a regular basis | Agreed. A fitness test is conducted before employing any labour on site. Occupational health surveillance reports are attached as Annexure XIX . MoU has been signed with nearby hospital and the same is attached as Annexure XII . |
| vi | A First Aid Room shall be provided in the project both during construction and operations of the project. | First Aid room has been provided on site and logbook of the same. Photograph is attached as Annexure II . |
| IX. Corporate Environment Responsibility | | |
| i | The project proponent shall comply with the provisions contained in this Ministry's OM vide F.No. 22-65/2017-IA.III dated 1st May 2018, as applicable, regarding Corporate Environment Responsibility. | CER activities will be done as per latest notifications. |
| ii | The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any Infringements/ deviation/ violation of the environmental/ forest wildlife norms/ conditions. The company shall have defined system of reporting infringements | Noted. This is under consideration of the board and will be shared with upcoming compliance reports. |

| | | |
|--------------------------|---|----------------------|
| Project Name | Six Monthly Compliance Report for Corporate Office Building Project | June 2023 |

| | | |
|-------------------------|--|--|
| | deviation/ violation of the environmental/ forest/ wildlife norms/ conditions and/Or shareholders/ stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report. | |
| iii | A separate Environmental Cell both at the project and company headquarter level, with qualified personnel shall be set up under the control of senior Executive, who directly to the head of the organization. | Noted. This is under consideration of the board and will be shared with upcoming compliance reports. |
| iv | Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report. | Noted. The Environment Management Plan has already been shared with the EC Proposal (Form 1, Form 1A, Conceptual Plan). The expenditure will be shared with upcoming compliance reports. |
| v | PP must submit the Balance sheet/Account statement duly attested & signed by the Chartered Accountant showing the dispersal of funds in said schemes along with the "Six Monthly Compliance Report" positively. | Noted. This will be shared in with the upcoming compliance reports. |
| X. Miscellaneous | | |
| I. | The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEF&CC/SEIAA website where it is displayed. | Agreed. The advertisements has already been done and attached in previous mail. Annexure XIV. |
| II. | The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to | Agreed. The EC letters have already been circulated in the Government Departments. |

| | display the same for 30 days from the date of receipt. | |
| III. | The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis. | Agreed. The status of EC Compliance is being uploaded on the portal. |
| IV. | The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal and soft copy of the same to the SEIAA. Haryana. | Agreed. This is being done on half yearly basis on their website. |
| V. | The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company. | Noted. |
| VI. | the project proponent shall inform the Regional office as well as the Ministry, the date of financial closure and final approved of the project by the concerned authorities, commencing the land development work, and start of production operation by the project. | Noted. |
| VII. | The project authorities must strictly adhere to the stipulations made by the state Pollution Control Board and the State Government. | Noted and Agreed. |
| VIII. | The project proponent shall abide by all the commitments and recommendations made in the form-1A, Conceptual Plan and also that during their presentation to the Expert Appraisal Committee. | Agreed. |
| IX. | No further expansion or modifications in the plan shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC)/SEIAA, Haryana. The project | Noted. |

| | proponent shall seek fresh environmental clearance under EIA notification 2006 if at any stage there is change of area of this project. | |
| X. | Any change in planning of the approved plan will leads to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance. | Noted. |
| XI. | The PP should give unambiguous affidavit giving land promoters in accordance with your ownership and possession of land legal the case referred for Environment Clearance to SEIAA. | Noted. The ownership documents have already been shared with the EC Proposal. |
| XII. | Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986. | Noted. |
| XIII. | The Ministry/SEIAA may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory. | Noted. |
| XIV. | The Ministry/SEIAA reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions. | Noted. |
| XV. | The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports. | Agreed. |
| XVI. | The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974. the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules. 2016 and the Public Liability Insurance Act. 1991 along with their amendments and Rules and any other | Noted and Agreed. |

| | proponent can not absolve himself /herself of the responsibility by shifting it to any contractor engaged by project proponent. Besides the developer/applicant, the responsibility to ensure the compliance of Environmental Safeguards/ conditions imposed in the Environmental Clearance letter shall also lie on the licensee/licensees in whose name names the license/CLU has been granted by the Town & Country Planning Department, Haryana. | |
| XXIV. | The project proponent shall seek fresh Environmental clearance if at any stage there is change in the planning of the proposed project. | Agreed. |
| XXV. | In view of the severe constrains in water supply augmentation in the region and sustainability of water resources, the developer will submit the NOC from CGWA specifying water extraction quantities and assurance from HUDA/ utility provider indicating source of water supply and quantity of water with details of intended use of water-potable and non-potable. Assurance is required for both construction and operation stages separately. It shall be submitted to the SEIAA and RO, MOEF, Chandigarh before the start of construction. | Noted. |
| XXVI. | Vertical fenestration shall not exceed 60% of total wall area. | Agreed. |
| XXVII. | The Project Proponent shall keep the plinth level of the building blocks sufficiently above the level of the approach road to the Project. Levels of the other areas in the Projects shall also be kept suitably so as to avoid flooding. | Agreed. The project is under development and currently the sub structure is being developed. The said condition will be complied with. |
| XXVIII. | The project proponent shall construct a sedimentation basin in the lower level of the project site to trap pollutant and other wastes during rains. | Noted. The said condition pertains to the operational phase. |
| XXIX. | The project proponent shall provide proper rasta of proper width and proper strength for the project before the start of | Agreed. As per the condition, proper Rasta of proper width and proper strength has been provided for the project before the start of |

| | construction. | construction. |
| XXX. | The project proponent shall provide fire control room and fire officer for building above 30 meter as per National Building Code. | Noted. Currently the project is under construction. However, fire safety equipment's have been provided on site. |
| XXXI. | The project proponent shall discharge excess of treated waste water/storm water in the public drainage system and shall seek permission of HUDA before the start of construction. | Noted. Prior permission will be obtained for discharge of treated sewage or Stormwater. |
| XXXII. | The project proponent shall maintain the distance between STP and water supply line. | Noted. |
| XXXIII. | The project proponent shall ensure that the stack height is 6 meter more than the highest tower. | Noted. |
| XXXIV. | For disinfection of the treated wastewater ultra-violet radiation or ozonization process should be used. | Noted. The STP is under construction. It will be followed as same in operation phase. |
| XXXV. | The project proponent shall strive to minimize water in irrigation of landscape by minimizing grass area, using native variety, xeriscaping and mulching, utilizing efficient irrigation system, scheduling irrigation only after checking evapo-transpiration data. | Noted. The said condition will be complied in the Operational Stage. |
| XXXVI. | The Project Proponent shall use zero ozone depleting potential material in insulation, refrigeration, air-conditioning and adhesive. Project Proponent shall also provide Halon free fire suppression system | Noted. The said condition will be complied in the Operational Stage. |
| XXXVII. | Standards for discharge of environmental pollutants as enshrined in various schedules of rule 3 of Environment Protection Rule 1986 shall be strictly complied with. | Noted. |
| XXVIII. | All electric supply exceeding 100 amp, 3 phase shall maintain the power factor between 0.98 lag to 1 at the point of connection. | Noted. The said condition will be complied in the Operational Stage. |
| XXXIX. | The project proponent shall not use fresh water for HVAC and DG cooling. Air based HVAC system should be adopted and only treated water shall be used by project | Noted. |

| | | |

| | proponent for cooling, if it is at all needed. The Project Proponent shall also use evaporative cooling technology and double stage cooling system for HVAC in order to reduce water consumption. Further temperature, relative humidity during summer and winter seasons should be kept at optimal level. Variable speed drive, best Co-efficient of Performance (Cop), as well as Integrated Point Load Value and minimum outside fresh air supply may be resorted for conservation of power and water. Coil type cooling DG sets shall be used for saving cooling water consumption for water cooled DG sets. | |
| XL. | The project proponent shall ensure that the transformer is constructed with high quality grain oriented, low loss silicon steel and virgin electrolyte grade copper. The project proponent shall obtain manufacturer's certificate also for that. | Noted. The said condition will be complied in the Operational Stage. |
| XLI. | The project proponent shall ensure that exit velocity from the stack should be sufficiently high Stack shall be designed in such as way that there is no stack down- wash under any meteorological conditions. | Noted. The said condition will be complied in the Operational Stage. |
| XLII. | The validity of this environment clearance letter is valid up to 7 years the date of issuance of EC letter. The environment clearance conditions applicable till life space project in case of Residential project will continue to apply. The resident welfare association housing co-operative societies shall be taken as per the laid down in EC. In case of violation the action would be taken as per the laid down law of land. Compliance report should be sent to this office till life of the project. | Agreed. |
| XLIII. | If project is not completed within the validity period then the project proponent shall submit the application for extension of validity within one month before the lapse of | Noted. |

| | | |

| Permissible Domestic Effluent Parameters | |
| 1. BOD | 10 mg/l |
| 2. COD | 50 mg/l |
| 3. TSS | 25 mg/l |

| | |
|--|-----------------------|
| 4. Total nitrogen | 10 mg/l |
| 5. total phosphorus | 1 mg/l |
| 6. FC should be less than | 100 mg/l |
| Permissible Trade Effluent Parameters | |
| 1. BOD | 0 mg/l |
| Number of stacks | 3 |
| Height of stack | |
| 1. height of stack to dg set 750 kva | 6 m |
| 2. height of stack to dg set 750 kva | 6 m |
| 3. height of stack to dg set 650 kva | 6 m |
| Permissible Emission parameters | |
| 1. SPM | 150 mg/m ³ |
| Capacity of boiler | |
| 1. na | 0 Ton/hr |
| Type of Furnace | |
| 1. na | 0 na |
| Type of Fuel | |
| 1. Diesel | 0.48 KL/day |

Regional Officer, Gurgaon North
Haryana State Pollution Control Board.

Terms and conditions

1. The industry has declared that the quantity of effluent shall be 40 KL/Day i.e 0KL/Day for Trade Effluent, 0 KL/Day for Cooling, 40 KL/Day for Domestic and the same should not exceed .
2. The above 'Consent to Establish' is valid for 60 months from the date of its issue to be extended for another one year at the discretion of the Board or till the time the unit starts its trial production whichever is earlier. The unit will have to set up the plant and obtain consent during this period.
3. The officer/official of the Board shall have the right to access and inspection of the industry in connection with the various processes and the treatment facilities being provided simultaneously with the construction of building/machinery. The effluent should conform the effluent standards as applicable
4. That necessary arrangement shall be made by the industry for the control of Air Pollution before commissioning the plant. The emitted pollutants will meet the emission and other standards as laid/will be prescribed by the Board from time to time.
5. The applicant will obtain consent under section 25/26 of the Water (Prevention & Control of Pollution) Act, 1974 and under section 21/22 of the Air (Prevention & Control of Pollution) Act, 1981 as amended to-date-even before starting trial production
6. The above Consent to Establish is further subject to the conditions that the unit complies with all the laws/rules/decisions and competent directions of the Board/Government and its functionaries in all respects before commissioning of the operation and during its actual working strictly.

7. No in-process or post-process objectionable emission or the effluent will be allowed, if the scheme furnished by the unit turns out to be defective in any actual experience
8. The Electricity Department will give only temporary connection and permanent connection to the unit will be given after verifying the consent granted by the Board, both under Water Act and Air Act.
9. Unit will raise the stack height of DG Set/Boiler as per Board's norms.
10. Unit will maintain proper logbook of Water meter/sub meter before/after commissioning.
11. That in the case of an industry or any other process the activity is located in an area approved and that in case the activity is sited in an residential or institutional or commercial or agricultural area, the necessary permission for siting such industry and process in an residential or institutional or commercial or agricultural area or controlled area under Town and Country Planning laws CLU or Municipal laws has to be obtained from the competent Authority in law permitting this deviation and be submitted in original with the request for consent to operate.
12. That there is no discharge directly or indirectly from the unit or the process into any interstate river or Yamuna River or River Ghaggar.
13. That the industry or the unit concerned is not sited within any prohibited distances according to the Environmental Laws and Rules, Notification, Orders and Policies of Central Pollution control Board and Haryana State Pollution Control Board.
14. That of the unit is discharging its sewage or trade effluent into the public sewer meant to receive trade effluent from industries etc. then the permission of the Competent Authority owing and operating such public sewer giving permission letter to his unit shall be submitted at time of consent to operate.
15. That if at any time, there is adverse report from any adjoining neighbor or any other aggrieved party or Municipal Committee or Zila Parishad or any other public body against the unit's pollution; the Consent to Establish so granted shall be revoked.
16. That all the financial dues required under the rules and policies of the Board have been deposited in full by the unit for this Consent to Establish.
17. In case of change of name from previous Consent to Establish granted, fresh Consent to Establish fee shall be levied.
18. Industry should adopt water conservation measures to ensure minimum consumption of water in their Process. Ground water based proposals of new industries should get clearance from Central Ground Water Authority for scientific development of previous resource.
19. That the unit will take all other clearances from concerned agencies, whenever required.
20. That the unit will not change its process without the prior permission of the Board.
21. That the Consent to Establish so granted will be invalid, if the unit falls in Aravali Area or non conforming area.
22. That the unit will comply with the Hazardous Waste Management Rules and will also make the non-leachate pit for storage of Hazardous waste and will undertake not to dispose off the same except for pit in their own premises or with the authorized disposal authority.
23. That the unit will submit an undertaking that it will comply with all the specific and general conditions as imposed in the above Consent to Establish within 30 days failing which Consent to Establish will be revoked.
24. That unit will obtain EIA from MoEF, if required at any stage.

25. In case of unit does not comply with the above conditions within the stipulated period, Consent to Establish will be revoked.
26. That unit will obtain consent to operate from the board before the start of product activity.

Specific Conditions

Other Conditions :

1. The project proponent will obtain all necessary clearances from all concerned departments. 2. Project proponent will not change the quantity of domestic effluent/trade effluent/air emission without prior permission of the Board. Project Proponent will obtain prior CTO before starting of production and apply for CTO/ CTE Extension at least 90 days before expiry date of this CTE. 3. Project Proponent will install STP/ETP/APCM along with the main project. 4. Project Proponent will install adequate acoustic enclosures/chambers on their DG SETS with proper stack height as per prescribed norms to meet the prescribed standards under EP Rules. 5. Project Proponent will comply with the provisions of Water Act, 1974, Air Act, 1981, Solid Waste Management Rules, 2016, Hazardous & Other Waste Management Rules, 2016, Plastic Waste Management Rules, 2016, E-Waste Management Rules, 2016, Battery Managements Rules, C&D Waste Management Rules, 2016& amendments and other applicable environmental legislation. 6. Project Proponent will use only treated effluent supplied from Sewage treatment plant during construction phase of the project 7. That this CTE will not provide any relaxation /benefit from any other Act/Rules/Regulations applicable to the project/land in question. 8. Project Proponent will not discharge any type Treated or untreated effluent outside the premises of the project. 9. Project Proponent will not use in their DG set as a fuel i.e. pet coke, furnace oil and LSHS etc. 10. Stack emission level should be stringent than the existing standards in terms of the identified critical pollutants. 11. Effective fugitive emission control measures should be imposed in the process, transportation, parking etc. 12. Encourage use of cleaner fuels (pet coke / furnace oil /LSHS may be avoided). 13. Best available technology may be used. For example usage of EAF/SAF/IF in place of Cupola Furnace, Usage of Supercritical technology in place of sub – critical technology. 14. Increase of green belt cover by 40% of the total land area beyond the permissible requirement of 33%, wherever feasible. 15. Stipulation of greenbelt outside the project premises such as avenue plantation, plantation in vacant areas, social forestry etc. 16. Assessment of carrying capacity of transportation load on the roads inside the industrial premises. If the roads required to be widened, shall be prescribed as a condition. 17. Project Proponent will not discharge any type of effluent inside & outside of the premises of the project and reuse/recycle of treated waste water be ensured. 18. Continuous monitoring of emission and effluent quality / quantity to be installed & will connect the same with server of CPCB and HSPCB. 19. A detailed water harvesting plan may be submitted by the project proponent. 20. Project Proponent will achieve zero discharge and install latest technology of STP/ETP and reuse/recycle of treated effluent. 21. In case, domestic waste water generation is more than 10 KLD, the industry may install STP. 22. Dumping of waste (fly ash, slag, red mud etc.) may be permitted only at designated locations approved by SPCBs/PCCs. 23. More stringent norms for management of hazardous waste. The waste generated should be preferably utilized in co-processing. 24. Monitoring of compliance of EC conditions may be submitted with third party audit every year. 25. Project Proponent will dispose off their waste/spent oil of DG sets only to authorize recyclers by the HSPCB. 26. The % of the CER may be least 1.5 times the slabs given in the OM dated 01.05.2018 for SPA and 2 times for CPA in case of Environmental Clearance. 27. Project proponent will comply all the directions of CPCB in this regard and will comply all the orders issued by any court in this regard. 28. Project Proponent will submit an affidavit regarding compliance of above said conditions within 30 days. 29. The above Consent to Establish is further subject to the conditions that the unit complies with all the laws/rules/decisions and competent directions of the Board/Government and its functionaries in all respects before commissioning of the operation and during its actual working strictly. 30. Unit will deploy anti –smog guns at site to comply with the above said directions & keep proper record of operation of the same and submit action taken report to this office within 03 days positively, failing which action shall be initiated as per applicable Acts/ Rules /Notifications. 31. Project proponent will comply with all the conditions mentioned in Environmental Clearance granted vide letter dated 28.10.2020 and submit the compliance of the same within 90 days to this office. 32. CTE so granted is on the basis of detail submitted by the unit in online application, CTE granted will be without prejudice to any violation made by unit in past & will be deemed revoked & further action will be taken as per law if any violation is observed at any stage. 33. The Project Proponent/unit will not claim any benefits on the basis of this CTE in respect of past violation committed by them 34. Unit will not do any construction work in their project without obtaining valid renewed license from DTCP and CTE will be become null and void if unit fails to renew DTCP license. 35. At any stage, if any violation observed of any above conditions at any time, this CTE stands cancelled /revoked & further action will be taken as per law if any violation is observed at any stage.

गैर-वन भूमि पर वन कानून लागूकता के विषय में स्पष्टीकरण पत्र।

Clarification letter regarding applicability of forest laws on non forest land.

Applicant Hyundai Motor India Limited at village /city Gurgaon District Gurgaon
made a proposal to use this land for Building Construction

a) As per records available above said land is not part of notified Reserved Forest, Protected Forest under Indian Forest Act, 1927 or any area closed under section 4 of Punjab Land Preservation Act, 1900.

b) It is clarified that by the Notification No. S.O.B/PA 2/1900/5, 4/2013 dated 4th January, 2013, all Revenue Estate of Gurgaon is notified u/s 4 of PLPA 1900 and S.O.81/PA.2/1900/5,3/2012 u/s 3 of PLPA 1900. The area is however not recorded as forest in the Government record but felling of any tree is strictly prohibited without the permission of Divisional Forest Officer, Gurgaon.

c) If approach is required from Protected Forest by the user agency, the clearance/ regularization under Forest Conservation Act 1980 will be required. Without prior clearance from Forest Department, the use of Forest land for approach road is strictly prohibited. M/s Hyundai Motor India Limited whose land is located at village/city, Gurgaon District Gurgaon must obtain clearance as applicable under Forest Conservation Act 1980.

d) As per the records available with the Forest Department, Gurgaon the area does not fall in areas where plantations were raised by the Forest Department under Aravalli project.

ANTI SMOG GUN SPECIFICATIONS

Table of Contents

1. Technology Overview
2. Project Details
3. Make & Warranties
4. Scope of supplies by cloud techy technical details
5. Scope of work
6. Commercials
7. Terms & Condition

Technology Overview

Cloud Tech Anti-Smog Gun uses high pressure water fogging with turbo air flow which creates a ultra-fine fog consisting of very fine water droplets. (10-20 micron size)

Cloud Tech Cooling Guns drop temperatures by as much as 10 degrees by employing evaporative cooling principles in our outdoor/ indoor cooling systems. Cloud Tech cooling Guns creates a pleasant and comfortable environment year-round for you and your family, dramatically increase the usable living space in your home, working areas, malls by adding cooling to indoor areas, covered patios, courtyards, pool decking, play areas and more.

Take advantage of the same technology that world-class resorts, industries use to enhance living and working comfort by adding a Cloud Tech Cooling Cannon System to your place. Friends, family & guests will enjoy the amenity - neighbours will be envious.

Cooling Cannons provide cooling through evaporation and suppresses even the tiny dust particles. Evaporative cooling is a very simple process. Water requires energy to evaporate (600 calories of heat per gram of water, to be exact). As the mist evaporates the energy exchange results in temperature reductions.

Salient Features of Cloud Tech Anti-Smog Gun.

- Effective cooling without wetting and suppression of dust & smog.
- Auto control system, keep stable and suitable outdoor/indoor environment.
- Large spraying volume, long-term use.
- Minimum maintenance.
- Industrial Electrical Protections.
- Heavy duty equipment for 24x7 operations.

Project Details

The proposal is for the turnkey setting up of Anti Smog Guns.

PROJECT LOCATION

| Site Details | | | |
|--------------|------------------|------------|---------------|
| SN. | Site Description | Dimensions | Product |
| 1 | Production Area | | Anti-Smog Gun |

| 4. | Booster Pump | Cloud Tech | 1 year |

Scope of supplies by Cloud Tech/ Technical details

- 1. CTFC-15 Pole mounted Anti-smog gun, Throw: 20 meters (windless condition)
- Skid with heavy duty bearing for Automatic 360° rotation leveling jack, water filter support, and portable tower.
- Blower CTFC15 complete with electric motor vent, with high efficiency vent and air flow straighteners, electric protection, aluminium impeller, stainless steel nozzles- 36 nos.
- Automatic system for rotation (0°-360°) and manual raising (0°- 60°)
- Electric control panel with on/off command of the blower and pump with automatic oscillation option.
- Electric high pressure water pump, 2 LPM at 70 bars, electric cables, PG, supports, electric control and supplementary protections.
- Complete automatic control over 0- 360° adjustable oscillation.
- 1/2" high pressure water feed hose.
- Tower for fixing cannon at height- 5 ft.
- Factory testing of each unit supplied.
- Total power- 7 KW

Scope of work (Client)/Exclusion

- Power and water supply up to Anti-Smog Gun.
- Lifting equipment on job site for men and machine.

ANNEXURE XVII
LETTER SUBMISSION ACKNOWLEDGEMENT

Date : 29/10/2021

HMI/FT/SEIAA/C11/C11A/09

To,
The Chairman,
State Level Environment Impact Assessment Authority (SEIAA),
Haryana.

Subject: Regarding non applicability of certain stipulated conditions in the Environment Clearance Letter granted to Hyundai Motor India Ltd. at Plot No. C-11 and C-11A, City Centre, Sector 29 at Urban Estate-II, Gurugram, Haryana.

Ref:

- i. **Proposal No.:** SIA/HR/MIS/150547/2020
- ii. **EC Letter (Expansion):** SEIAA(125)/HR/2020/476 dated 28/10/2020
- iii. **EC Letter (Fresh):** SEIAA/HR/2018/73 dated 05.02.2018
- iv. **Office Memorandum:** F. No. 22-65/2017-IA.III dated 30.09.2020
- v. **Office Memorandum:** F. No. 22-65/2017-IA.III dated 20.10.2020

Respected Sir,

With respect to the above mentioned subject & references; it is kindly intimated that we have obtained the Environment Clearance for our project. However, certain conditions are not applicable on our project and we request you to kindly remove these conditions from our Environment Clearance Letter. These are mentioned below, along with clarification for non applicability:

1. Condition No. **"II. Water Quality Monitoring and Preservation": Point No. xii:** A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In area where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority

Clarification: It is to bring to your kind notice that we have submitted the proposal and presented in front of SEAC and SEIAA that a total of 4 pits (including existing and proposed project) shall be constructed and the same has been approved. It has been mentioned in the point 13 & 14 under specific condition of EC letter (ref page 1) issued to us. So, this condition is not applicable on our project.

2. Condition No.: **"IX. Corporate Environment Responsibility": Point no. i:** The project proponent shall comply with the provisions contained in this Ministry's OM vide F. No. 22-65/2017-IA.III dated 1st May 2018, as applicable, regarding Corporate Environment Responsibility.
