Pleos Connect

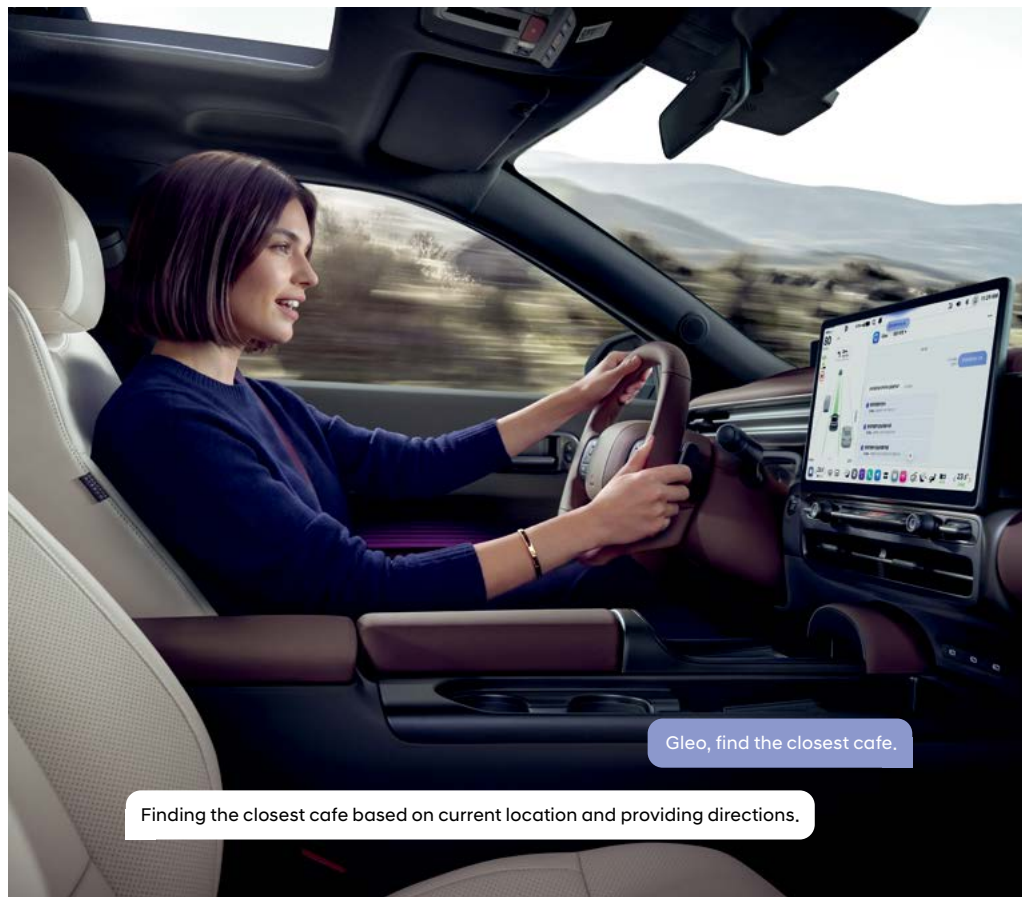

* Scan the QR code to see more details.

Next-generation infotainment system Pleors Connect

The SDV era, where software determines vehicle value.
Powered by OTA updates and AI technology,
delivers an increasingly smarter mobility experience over time.

* Infotainment system display may change depending on updates. * The image shown is for illustrative purposes only and may differ from the actual product.

When guidance is needed

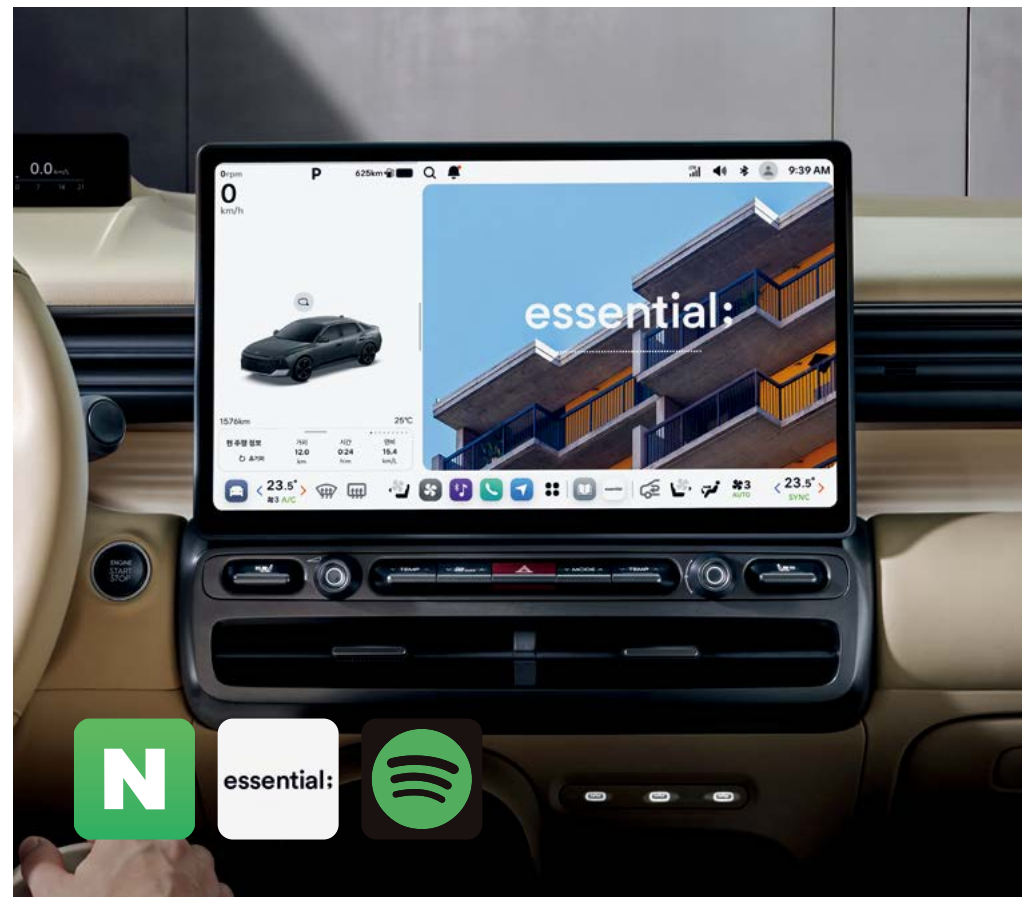

Gleo AI

Gleo AI is a generative AI based on a large language model (LLM) that understands your everyday language and context. Capable of setting destination to adjusting cabin temperature, and checking for weather. Control your vehicle just by using your voice, like talking to a trusted partner in the passenger seat.

* Infotainment system display may change depending on updates. * The image shown is for illustrative purposes only and may differ from the actual product.

When at a stop

App Market

Equipped with an open app ecosystem based on AAOS (Android Automotive OS), a variety of vehicle-optimized apps, including music and OTT services, are available in addition to the standard features provided at vehicle delivery.

When on the move

Evolved navigation

An intuitive display streamlined around key functions allows key information to be viewed at a glance, even while driving. Integrating Korea's largest real-time traffic data with online maps provides more accurate route guidance.

When connection is needed

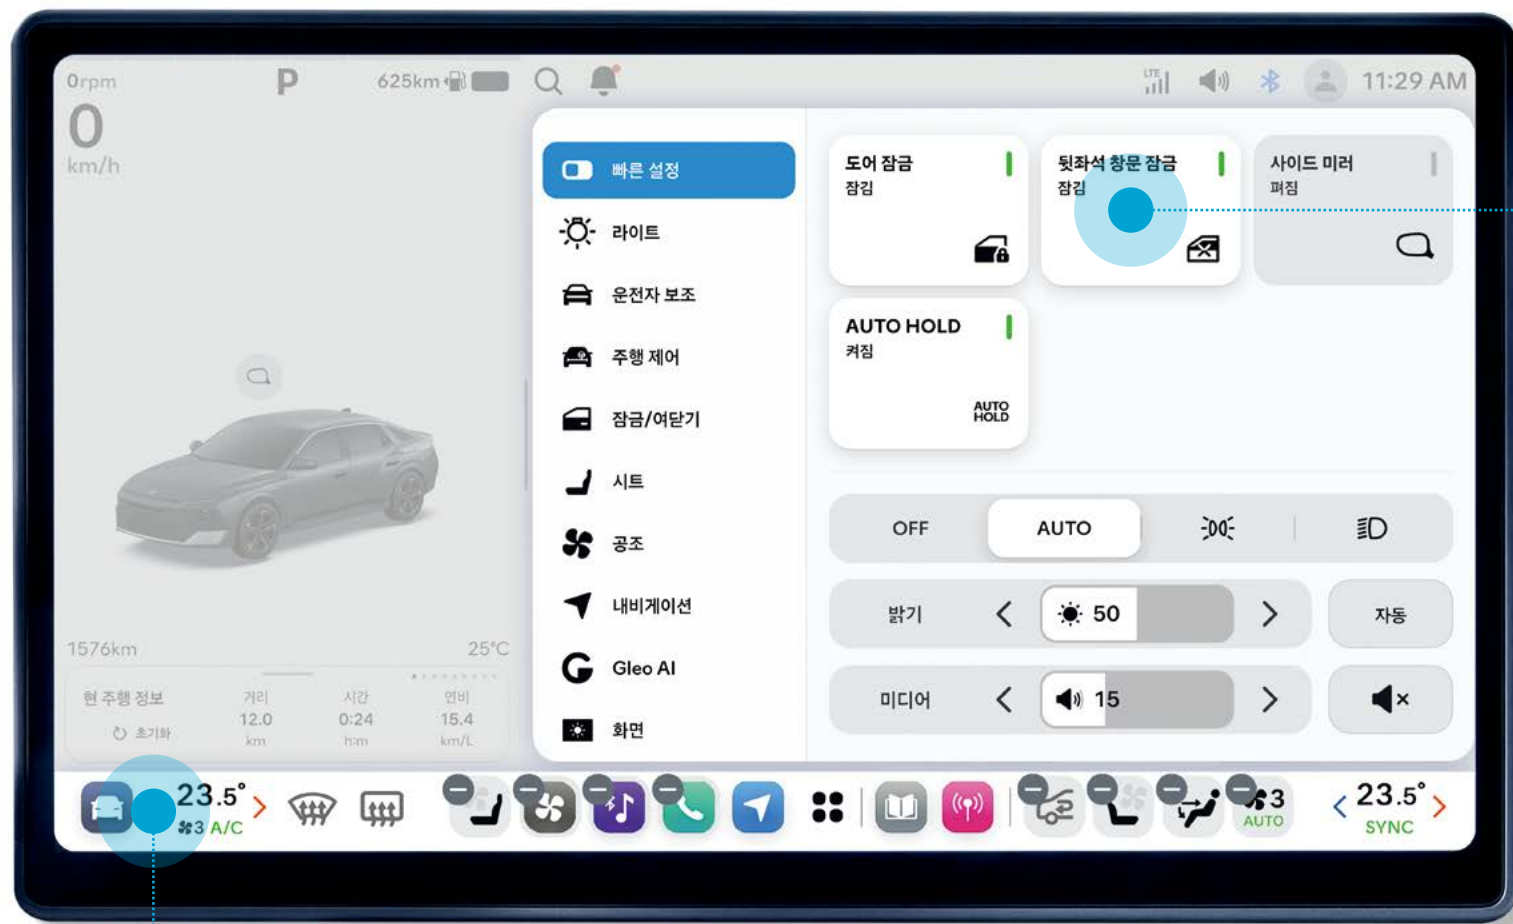

Android Auto, Apple CarPlay

Android Auto and Apple CarPlay support for more convenient smartphone and vehicle connectivity. Minimizing switching between apps and vehicle functions delivers a more intuitive user experience.

Control

Intuitively view and control your vehicle through the large display.

Quick Control

Quick Control organizes frequently used functions by category, allowing intuitive vehicle status monitoring and easy control. By setting routines based on time, temperature, and driving conditions, frequently used functions can be activated automatically.

Soft key-based controls

Quick settings menu set-up

Vehicle functions activated by routines

Bottom Bar

The intuitively designed bottom bar allows frequently used functions, including climate controls, and App Market to be arranged according to the driver's preferences.

Climate and key function controls

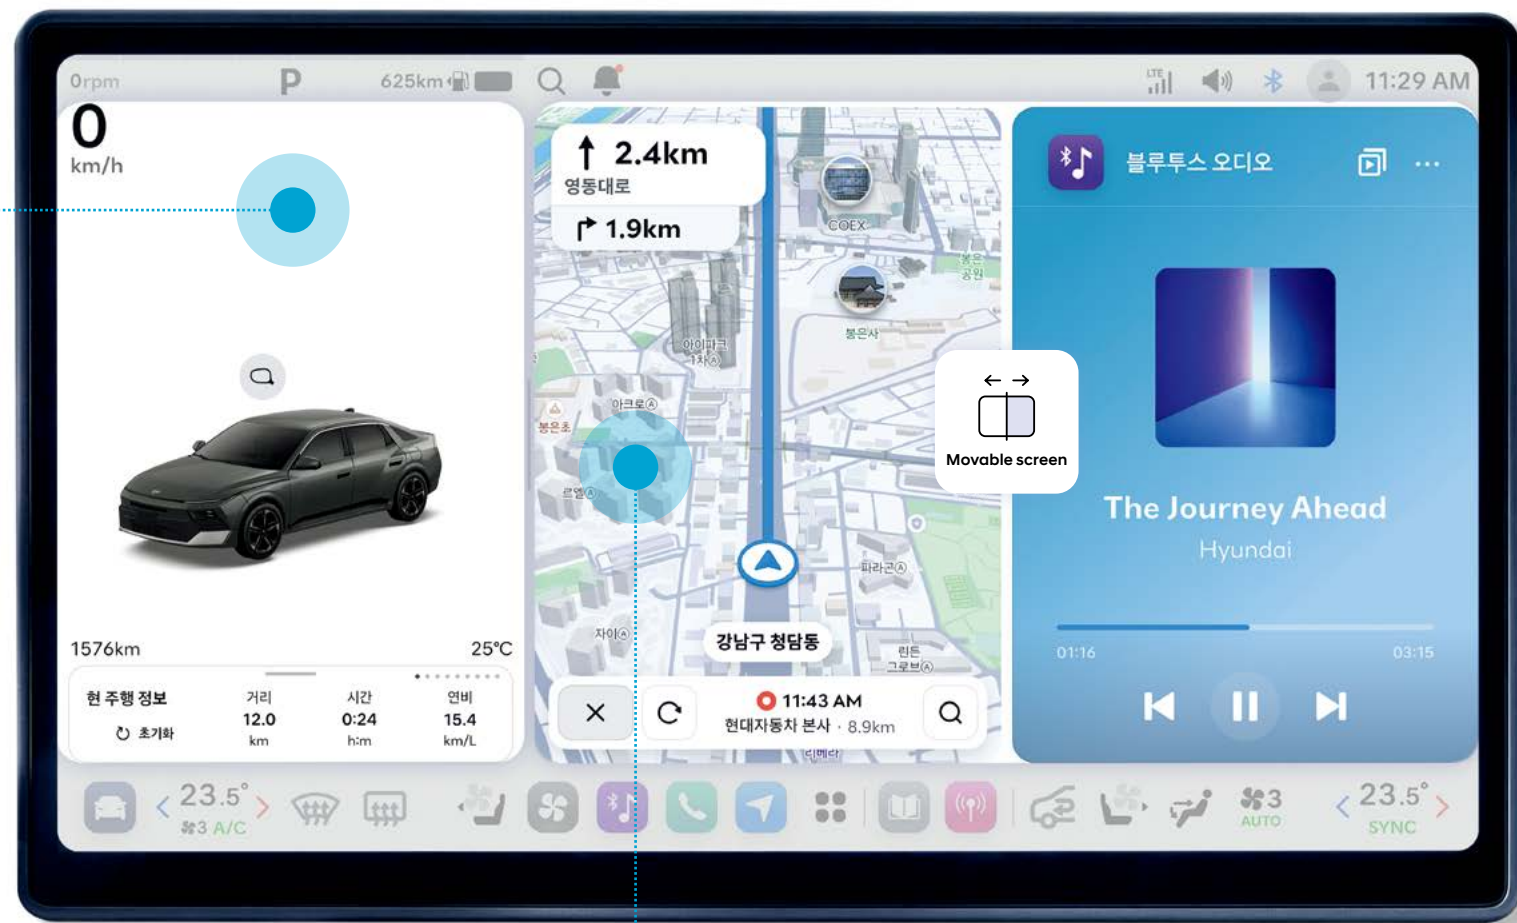

Music, phone, and other app shortcuts

Driving information display

Displays key information the driver needs to quickly check, including speed, distance traveled, and warning information. While driving, vehicle speed, transmission status, and ADAS activation status are displayed together.

3D Immersive 3D driving view

 Vehicle & driving Information at a glance

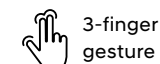

App Screen

Navigation, vehicle settings, and multimedia can be freely accessed, while the split-screen function enables two apps to run simultaneously or a single app to be expanded to full screen.

Android Auto,
Apple CarPlay

3-finger
gesture

* Infotainment system display may change depending on updates.
 * The image above shows the central display with the 'Light Theme' applied.
 * The image shown is for illustrative purposes only and may differ from the actual product.

Exterior

Expressed through Hyundai's 'Art of Steel' design language, the harmony of the bold fenders and H-Edge Lighting completes a sporty and confident look.

* 'Art of Steel' is the design identity that transforms the natural resilience of steel into sculptural beauty for AVANTE.

4,000rpm

203 Max. Motor Torque(Nm)

Driving

Completes a confident driving experience with effortless performance.

More on
Driving

Memory Reverse Assist

Based on the path taken into a narrow space, steering is automatically controlled while reversing by following the recorded path, to support stable and precise maneuvering.

Pedal Misapplication Safety Assist

When unintended sudden acceleration caused by pedal misapplication is detected after starting from a stop, the system detects nearby obstacles, limits acceleration, and applies emergency braking to help prevent a collision.

Surround View Monitor

Video captured by four wide-angle cameras is merged to show the vehicle's surroundings from various views. Five view modes, including Front + Top View, Rear + Side View, and 3D View, can be selected according to the situation. The transparent vehicle display allows blind spots beneath the vehicle to be viewed more intuitively.

Blind-spot View Monitor

When the turn signal switch is operated, the rear-side view in the corresponding direction is displayed on the center display.

10 Airbag system (1st-row advanced/center side, 1st-/2nd-row side, driver's knee, and rollover-resistant curtain airbags)

With a 1st-row center side airbag, 1st-row advanced airbags, 1st-/2nd-row side and rollover-resistant curtain airbags, and a driver's knee airbag, occupants are protected with enhanced safety.

Vibration warning steering wheel

When dangerous driving situations, such as lane departure or a risk of frontal collision, are detected, the steering wheel vibrates to intuitively warn the driver.

Function

Convenience technologies for a smarter everyday life.

More on
Function

Audio by BANG & OLUFSEN sound (12 speakers and external amp)

Audio by BANG & OLUFSEN premium sound delivers exceptionally refined sound through 12 high-performance speakers with an external amplifier, and an immersive listening experience through a greater sense of space.

Built-in Cam 2 Plus

Dedicated QHD+ front/rear cameras provide clear image quality, along with voice recording, wireless software updates, and driving information storage. Through the Pleos Connect display and smartphone app, recordings can be viewed, played, downloaded, and the settings can be configured. Continuous parking recording is supported for up to 20 hours, while recorded footage can be transmitted and vehicle status can be checked when a parking impact is detected. Parking motion detection recording is newly added, supporting up to approximately four days or up to 530 recording events.

Function

Hands-On Detection

A current-sensing method that directly detects the driver's grip is applied to overcome the limitations of indirect grip detection.

Walk-away Lock

Moving away a set distance from the vehicle when in possession of a Smart Key or Digital Key automatically locks the doors.

2nd-row air vents

Equipped with 2nd-row air vents to provide a more comfortable cabin environment.

Digital Key 2

The vehicle can be locked, unlocked, or started via an iPhone, Apple Watch, or Android smartphone (e.g., Samsung phone), and access permissions can be shared with up to 15 devices.

* Please refer to Hyundai Motor's website for a list of supported models.

100W USB Type-C Ports (2 charging ports in the 1st-row, 2 charging ports total in the 2nd-row, one on each side, and genuine charging cable)

High-performance laptops, tablets and other various electronic devices can be rapidly and efficiently charged. Cabin provides powerful charging capabilities.

Power-adjustable driver's seat (8-way, and 4-way lumbar support)

The driver's seat is equipped with 8-way power adjustability to provide an optimal driving position.

Hyundai SmartSense

With next-generation ADAS, it sets a new standard for enhanced safety.

More on
Hyundai SmartSense

Forward Collision-avoidance Assist

Assists in automatic braking when risk of collision increases with vehicles, two-wheeled vehicles, pedestrians and cyclists in front. Also assists in automatic braking when risk of collision increases with vehicles driving on other side of the road, approaching from either side, and front oncoming vehicles while driving. Automatically assists in evasive steering when collision with oncoming vehicle or side vehicle is detected. Additionally, assists in evasive steering when risk of collision with vehicle on the edge of lane ahead or pedestrian is detected.

* Since the advanced driver assistance system (ADAS) is a function that assists the driver's operation, always drive with caution.

* The function may not operate smoothly or properly depending on the surrounding environment and driving conditions. In addition, the function may operate with restrictions depending on the regulation related to the certification of the advanced driver assistance system. For details, refer to the owner's manual.

* The above specifications are applied differently depending on the trim, powertrain, and specifications directly selected by the vehicle purchaser in consideration of price and preference.

Blind-spot Collision Warning (driving), Blind-spot Collision-avoidance Assist (forward exit/driving)

A warning is issued if risk of collision with a vehicle approaching from rear-side is detected while changing lanes. Additionally, assists in automatic braking when risk of collision increases with a vehicle approaching from rear-side while forward-exiting from a parallel-parked position.

Highway Driving Assist 2

Assists in maintaining set distance from the vehicle in front, set speed, and keeping the vehicle centered in lane when driving on highway/motorway. When driving above a certain speed, by activating the turn signals while holding the steering wheel, the vehicle will automatically change lanes.

Navigation-based Smart Cruise Control 2

When driving on highways, automobile-only roads, and general roads, the system supports automatic speed reduction in specific areas such as speed limit zones, speed bumps, and intersections, and returns to the previously set speed after passing through these areas.

* Since the advanced driver assistance system (ADAS) is a function that assists the driver's operation, always drive with caution.

* The function may not operate smoothly or properly depending on the surrounding environment and driving conditions. In addition, the function may operate with restrictions depending on the regulation related to the certification of the advanced driver assistance system. For details, refer to the owner's manual.

* The above specifications are applied differently depending on the trim, powertrain, and specifications directly selected by the vehicle purchaser in consideration of price and preference.

Lane Following Assist 2

The front camera detects lanes to assist the driver in maintaining the vehicle in the center of the lane. When lane detection is unavailable, the system detects the vehicle ahead to provide steering assistance when operating conditions are met. Enhanced with an expanded operating range (high-curvature), and steering angle control, lane centering performance is improved.

Rear Cross-Traffic Collision-avoidance Assist

Provides a warning when a risk of collision with a vehicle approaching from either side is detected during slow reverse driving, and automatically assists with braking if the collision risk increases after the warning.

Hybrid

Efficient driving, Stay Mode, and other dedicated features deliver an even smarter experience.

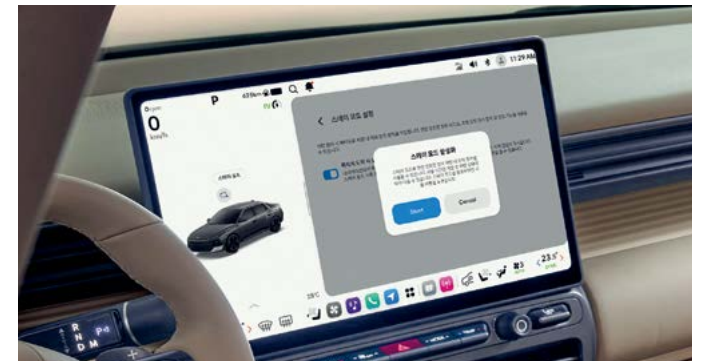

More on
Hybrid

e-Comfort Drive

e-Ride Gen1 (Electrically Controlled Ride Comfort Gen1)

Motor control minimizes vehicle movement when passing over a speed bump, delivering a comfortable and stable ride.

Stay Mode

Key convenience features, including climate control, entertainment, and mobile device charging, can be used with power from the vehicle battery, without starting the engine.

* Stay Mode cannot be activated if any of the following conditions are met:
battery charge is below 35%, the low fuel warning is on, the battery main relay is off,
or the vehicle is not in Park (P).

* Infotainment system display may change depending on updates.

AVANTE Hybrid Warranties	
Warranty for Hybrid parts	10-year/200,000-kilometer warranty - Electric motor, Hybrid high-voltage battery HPCU (Hybrid Power Control Unit)

* The benefits offered through the warranties above may be subject to change.
* Contact a branch or dealership for details.
* The warranty period starts from the date of new vehicle sale and expires when either the specified period or mileage is reached, whichever comes first.

Maintain a constant speed to drive more efficiently.

-The fuel economy described above is based on the standard model and may differ during actual driving depending on road conditions, driving technique, cargo load, vehicle maintenance, and outdoor temperature.
-Some of the images presented here include optional specifications, so their appearance may differ from the car you purchase. -The specifications, colors, and sources presented here may be modified to improve vehicle exterior and performance.
-The engine performance described above is the "Net Number," a new measure reflecting exhaust resistance that complies with legislation enforced by Korea's Ministry of Land and Transport since 1997. It can be marginally lower than "Gross Output Number," the previous measurement.
-Leather seats include some synthetic leather. -Vehicle colors presented here may differ from actual appearance. -Some specifications may vary for rented/handicap vehicles and regular vehicles.
-Hyundai Motor Company is committed to fair trade practices, with the same price and quality of vehicles nationwide.
-Use of engine oil or fuel that is of low quality may result in damage to the vehicle. -For more information about the new technologies and specifications described in this brochure, please refer to a user's manual.
